

Medical Documents Required for School Registration of Students Grade K-12

As per the WPS District website, parents/guardians are instructed to bring the following documents required for school entry *to their registration appointment*:

- ☐ **Record of a Physical Exam completed within the last 12 months** (or date of upcoming scheduled Physical Exam)

- ☐ **A current Immunization Record** showing compliance with immunizations required by the State of MA for school entry. (This is also typically included on the physical exam form but may also be submitted separately.)

- ☐ **Documentation of a TB risk assessment*** (This is typically included on the physical exam form, but may be submitted separately.)

- ☐ **Additional items required for Kindergarten Registration***
 - Documentation lead screening - must include the date of test and results.
 - Documentation of a vision screening with stereopsis.

Please be sure the above registration requirements are obtained prior to submitting records to the schools for review by a nurse.

*These items would not prevent a student from *starting* school, but they are required documents we need within a reasonable time from starting school.

Students who qualify as homeless will not be prevented from starting school if any documentation is missing. Nursing will work with those families as needed to access health services.
